TERRAFORM™ Specs

Our TerraForm™ collection offers a natural split face surface with hand chipped edges so you can fashion a wall with an organic and dimensionally textured look. All of our stones in this range are sawn-cut on the back and carefully split by hand on the remaining 5 sides, prior to packing in a crate, allowing for quality adhesion to all suitable substrates.

INSTALLATION TECHNIQUES

Dry Fit Style

This newer style of installing is considered the most technically advanced and current urban look in the international designer markets today. Use only skilled masons to achieve this look. Mockups are recommended.

Mortar Joint Style

This more Traditional style is a classic, versatile, and efficient use of our TerraForm™ material. Use different colored mortar joints to create a unique look that matches your unique project and design appetite.
